

The diagram shows a central vertical axis and two side axes. The central axis is a solid vertical line. The two side axes are represented by thick, hatched vertical bars. Each side axis contains a circle with a smaller inner circle. The circles are positioned such that they appear to be part of a larger structure, possibly a lattice or a network of paths.

Ø1200

A horizontal number line with six points marked by dots. Above the line, the values 450, 200, 3760, 1680, 200, and 450 are written from left to right, corresponding to the positions of the dots.
